

KRISHNA SHARMA

AI/ML Engineer | Software Developer

Gurugram, India | [+91-7817054258](tel:+91-7817054258) | ks76479@gmail.com | [LinkedIn](#) | [GitHub](#) | [Kaggle](#) | [Portfolio](#)

SUMMARY

Computer Science undergraduate with hands-on experience building a React.js product and Python machine learning projects. Applied CNNs to image classification and TF-IDF methods to sentiment analysis using TensorFlow/Keras and scikit-learn. Familiar with model evaluation, cross-validation, hyperparameter tuning, and REST API integration.

EDUCATION

J.S. University, Shikohabad | B.Tech in Computer Science Expected 2027
CGPA: 7.42/10 | AISSCE (Class 12): 80.2% (2021) | AISSE (Class 10): 93% (2019)

EXPERIENCE

WritED Edutech Private Limited | Software Development Intern | Remote Feb 2026 - Present

- Developed [WritED](#) from scratch using React.js and JavaScript, adding AI-assisted content features and performance analytics.
- Built reusable, responsive React components for desktop and mobile, reducing render time by 30%.
- Implemented client-side content handling and REST API integrations; collaborated through Git/GitHub in an Agile team.

PROJECTS

Handwritten Digit Classifier | Python, TensorFlow/Keras, CNN | [Kaggle](#) | [GitHub](#)

- Built a CNN-based MNIST digit classifier (70,000 images) with preprocessing, normalization, and data augmentation.
- Achieved 98.5%+ test accuracy with dropout and early stopping; used learning curves and a confusion matrix to diagnose overfitting and tuned the architecture for faster inference.

Sentiment Analysis System | Python, scikit-learn, NLTK, TF-IDF | [Kaggle](#) | [GitHub](#)

- Built a 3-class sentiment pipeline for 5,000+ samples using tokenization, stop-word removal, and TF-IDF.
- Benchmarked Logistic Regression, Naive Bayes, and Random Forest with cross-validation and grid search; achieved 85% accuracy.
- Evaluated precision, recall, F1-score, and ROC-AUC; used exploratory analysis to inspect word frequencies and n-grams.

TECHNICAL SKILLS

Programming: Python, C, C++, SQL, JavaScript

Machine Learning: supervised and unsupervised learning, regression, classification, clustering, feature engineering, cross-validation, hyperparameter tuning, scikit-learn

Deep Learning: CNNs, ANNs, TensorFlow, Keras, PyTorch, model training and evaluation, dropout, early stopping

NLP: NLTK, TF-IDF, tokenization, sentiment analysis, text preprocessing

Libraries and Tools: NumPy, Pandas, Matplotlib, Jupyter, Kaggle, Git/GitHub, Linux

Web and Databases: React.js, HTML5, CSS3, Tailwind CSS, MySQL
